

School Delivery Evidence Map

Pocket Money Adventures CIC | Version 1.1

Effective: 2 October 2026 | Review: 2 October 2027 or sooner on relevant change

Policy owner: Nathan Waldron, Director | Signatories: Nathan Waldron and Bernadette Houlton | Approved policy issue

Adopted by Pocket Money Adventures CIC on 2 October 2026.

Signed electronically: Nathan Waldron, Director and Designated Safeguarding Lead.

Signed electronically: Bernadette Houlton, Director and Deputy Designated Safeguarding Lead.

Typed electronic signatures in the established policy format.

Use

A factual support record for school self-evaluation. No Ofsted endorsement, inspection outcome or long-term causal impact is claimed.

Curriculum and content

Record story/activities, taught vocabulary and decision routine, age adaptation and the school's own curriculum connection. A 45-minute festival adaptation is labelled as such, not as completion of the full programme.

Participation and inclusion

Record safe aggregate headcount, participation formats and adjustments made; do not send child names, diagnoses or small identifying subgroup data to PMA. Note observed barriers and changes.

Family and classroom continuation

Record resources offered, free access information and suggested two-minute follow-up. Distribution is not proof that families used the materials. Teachers can retain their own school records.

Learning and limits

Distinguish observation, teacher feedback, immediate knowledge checks and longer-term measured outcomes. Record method, denominator, time and limitation. Do not turn enthusiasm or a single visit into proof of lasting financial behaviour.

Zero Child Data applies to routine learning, access and evaluation: no child names, accounts, personal finances, individual tracking or school-held match-code keys are collected by PMA. Standard PMA sessions do not involve PMA photographing or filming identifiable children. Necessary safeguarding, accident or legal records are an exception and are minimised, protected and shared lawfully. Pseudonymised codes are not automatically anonymous. Research beyond safe aggregates requires a separately approved protocol, lawful basis, privacy information and ethics arrangements before collection.

Issue control: current approved issue dated 2 October 2026. Earlier issues are archived. Policy approval does not complete host agreements, individual acknowledgements or venue checks.
